

ABIGAIL GATHONI MURIGI

Junior Software Developer | Frontend Specialist

Nairobi, Kenya | abigailmurigi01@gmail.com | github.com/abbie-software | linkedin.com/in/abigail-gathoni

PROFESSIONAL SUMMARY

An aspiring, detail-oriented frontend developer and BSc Mathematics and Computer Science student at JKUAT, with hands-on experience building full-stack web applications across hackathon teams and independent projects. Comfortable leading frontend architecture, working with relational databases, and picking up backend exposure through PHP and Java. Passionate about clean, component-based UI and growing into a full-stack developer.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, C, SQL (MySQL), HTML5, CSS3

Frameworks & Libraries: React, Next.js, Angular, Vite, Spring Boot

Databases: MySQL, Microsoft Access

Tools & Environments: Git, GitHub, Docker, Linux (Ubuntu), VS Code, Cursor AI

PROJECTS

ZiwaClear — Biomass Marketplace Platform — *Next.js, React, Tailwind CSS*

- Served as Frontend Architecture Lead on a hackathon team building a marketplace connecting biomass harvesters with industrial buyers, turning invasive water hyacinth into biogas and fertilizer.
- Built a live impact tracker dashboard and an interactive satellite map view of harvesting zones, alongside a persisted dark/light theme toggle.
- Placed 4th at the AYSC Climate Hackathon and 5th at the IGAD Climate Hackathon.

[Live demo: ziwa-clear.vercel.app](https://ziwa-clear.vercel.app)

LindaKazi — Offline-First Safety Platform for Gig Workers — *React Native*

- Served as Frontend Architecture Lead, building offline access to safety resources and guidelines for gig workers in low-connectivity areas.
- Built for the Girls in STEM Global Hackathon.

Abbie's Coffee House — E-Commerce Coffee Shop Platform — *HTML, CSS, JavaScript*

- Solo project: a fully responsive, multi-page website (Home, Menu, About, Contact) for a Nairobi coffee shop.
- Built a hero landing section with a clear call-to-action and a featured drinks showcase.

[Live demo: abbie-software.github.io/coffee-shop-website](https://abbie-software.github.io/coffee-shop-website)

Greenfield Institute — Student Login System — *PHP*

- Solo project: designed a secure authentication portal for a student management system.
- No live deployment, as Vercel does not natively support PHP.

ACHIEVEMENTS

- ZiwaClear — 4th Place, AYSC Climate Hackathon (Frontend Architecture Lead)
- ZiwaClear — 5th Place, IGAD Climate Hackathon (Frontend Architecture Lead)
- LindaKazi — Participant, Girls in STEM Global Hackathon (Frontend Architecture Lead)

CERTIFICATIONS

- Introduction to Cybersecurity — Cisco Networking Academy

EDUCATION

BSc Mathematics and Computer Science 2024 – 2028

Jomo Kenyatta University of Agriculture and Technology (JKUAT), Nairobi, Kenya

Relevant Coursework:

Internet Application Programming, Operating Systems, Object-Oriented Programming, Database Management Systems, Data Structures & Algorithms, Probability & Statistics, Abstract Algebra
